

Small Area Light(100W)

Medium Area Light(150W, 200W)

Large Area Light(250W, 300W)

GENERAL DESCRIPTION

The AL-LEDEAL series is the compact, efficient, economical approach to LED area lighting. This LED luminaire is designed one piece diecast aluminum slim profile which is 3G vibration rated minimizes wind load requirements. The AL-LEDEAL is an ideal cost-effective solution for a wide variety of area applications.

AL-LEDEAL are available in (3) sizes small(100W), medium (150W,200W) and large(250W,300W) with lumen output between 13,500 to 42,000 lumens replacing up to 1000W MH. This luminaire comes with a 5 year warranty and is available in Type III, Type IV, Type V optics, different mounting options, photocell, and motion sensors for efficiency and greater energy saving.

APPLICATION

Auto dealerships, parking lots, walkways, and other public area

LIGHTING UP THE WORLD
WITH ONE BULB AT A TIME!

SPECIFICATIONS

Housing

Rougged one-piece, die-cast aluminum housing

Mounting

Round pole
Square pole
Slipfitter and wall mount available

Ambient Temperature

Operating temperature -40°F to 113°F

Options

Twist lock photocell
Internal Motion Sensor

Finish

Polyster Powder dark bronze finished. Ohter optional color black, silver gray or white.

Efficacy

Up to 142 lumens per watt

CRI

70(CRI)

Lifespan

over 100,000 hours LED lifespan

Lumens

From 1,3200 to 4,2000 lumens

CCT

4000K and 5000K available

Electrical

Voltage 120-277V or 347V-480V
50/60Hz operation;

Distribution Type

Type III, Type IV and Type V

Compliance

Luminaires are cULus listed for damp locations -20 °C - 40°C. Design Light Consortium® Qualified and classified for DLC Premium, refer to www.designlights.org for details.

Warranty

Five year warranty

PHOTOMETRICS

Type3:

Type 3 optics produce an asymmetrical pattern that directs the majority of the light forward and equally on both sides of the luminaire. In a back-to-back configuration, it creates a rectangular pattern which can extend pole spacings.

Type4:

Type 4 is suitable for applications where light is primarily. Required forward with minimal backlight. Typical installations include perimeter poles.

Type5:

Type 5 optics produce a symmetrical square distribution pattern that distributes light equally on all sides of the luminaire. Type 5 luminaires is universal for most area lighting application.

OPTIONAL ACCESSORIES

1. Motion Sensor

BL-PIR-INT

Description

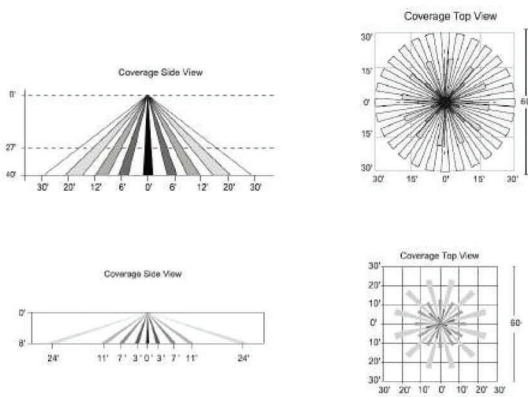

The BL-PIR is a passive sensor that detects a range of 360 degrees around the fixture using infrared technology in an area with or without obstructions. The sensor provides maximum energy savings by illuminating the fixture when motion is detected and turning it off automatically once motion is no longer detected. All functions are adjustable via a wireless configuration tool.

(Please see motion sensor spec sheet for more detail)

How it works

1. When sufficient natural light is present, the fixture will not illuminate when motion is detected.
2. When there is insufficient lighting and motion is detected in a space within range of the sensor, the fixture will illuminate automatically.
3. The light fixture will remain illuminated until the space is unoccupied, and will go into standby mode until motion is detected once again.
4. If the space remains unoccupied for half of the standby period, the fixture will automatically reduce to adjusted light levels.
5. At the end of the standby period, the fixture will turn off automatically until activated once again by motion.

Coverage

Voltage	Detect Area	Operating Temp	Mounting Height	Protection Rate
120/277VAC 50/60Hz	360°	-40 -158°F	maximum coverage 60' diameter from 40' height	IP66

2. Twist Lock Photocell

ALPC - twist lock photocell low voltage

- Dusk to dawn photocell sensor
- Switch life is greater than 5000 cycles
- Reduce maintenance cost and energy consumption
- UL Listed global safety certification

MODEL #	VOLTAGE	DELAY TIME	AMBIENT TEMPERATURE	PRODUCT SIZE	COLOR
ALPC	120-277VAC /480VAC	8-15 sec	(-40°F to 170°F)	80mmx64mm	Black

LIGHTING UP THE WORLD
WITH ONE BULB AT A TIME!

OPTIONAL ACCESSORIES

Installation Instruction

- Disconnect power before installation
- Fix the photocell base to the luminaire as the N-pole mark points to the lamp
- Wire the photocell base according to the wiring diagram
- Insert the photocell into the corresponding hole and twist clockwise tightly
- Adjust the photocell position to ensure the glazing surface face to the north

Dimensions(mm)

3. Mounting Option

Arm Mount

Arm Mount (4" and 5" Square and Round Poles)
Standard versatile mounting arm is simple to install and can be used with existing poles for retrofit installations.

Slipfitter Mount

Slipfitter Mount
An optional cast aluminum mast arm adapter secures fixture head to nominal 2" (2-3/8" O.D. pipe size) horizontal steel tenon arm

Wall Mount

Wall Mount
Wall mount is easy to install for direct wall mounting with 1/2" conduit wiring or standard J-box mounting.

LIGHTING UP THE WORLD
WITH ONE BULB AT A TIME!

OPTIONAL ACCESSORIES

Trunnion Mount

Trunnion mount

The trunnion is able to mount in any surface: wall, roof or wood pole. It can be used with 2-3/8" tennon mounting.

4. Additional Mounting Accessories

Pole Bracket

4" Square Pole Mount

4" Round Pole Mount

5" Square Pole Mount

5" Round Pole Mount

Tennon & Yoke Adaptor

Wall Bracket

Double 180° Horizontal Tenon Adaptor

Quad 90° Horizontal Tenon Adaptor

Triple 90° Horizontal Tenon Adaptor

LIGHTING UP THE WORLD
WITH ONE BULB AT A TIME!

INSTALLATION

Square / Round Pole

1. Remove the side plate from mounting bracket. Please skip to step 3 if mounted onto square pole.
2. Attach round pole mounting plate on mounting bracket.
3. Route the cord into mounting bracket through the hole for wiring, slide the fixture onto the bracket and tighten 2 bottom screws.
4. Slightly drag the wires to make sure the hole on bracket is sealed by silicon gasket.
5. Make wiring connection as per wire diagram below, replace the side plate and fasten screws.

(Figure 1)

Slipfitter

1. Connect the wires to L/N/GND.
2. Remove the cover and adjust the bracket to the desired angle.
3. Install the bracket on the pole and fix it with screws.

(Figure 2)

Wall Mount

1. Remove the side plate by loosen the screws.
2. Fix the back plate onto the arm bracket with screws provided.
3. Use the metal template provided to locate footprint on the wall to drill the holes, then fix the bracket on the wall with screws.
4. Route the power cord into wall mount bracket, slide the fixture onto the mounting bracket, then tighten bottom screws.
5. Make wiring connection inside of bracket and replace the side plate with screws.
